

Santa Ana Silver Project

SOUTH ANOMALY

-  Post-mineral tuff
 -  Andesitic volcanics; structural and crackle breccias w/ iron oxides - barite - Ag on fractures
 -  Quartz-feldspar porphyry dike
 -  Structural trends
 -  IP anomaly
 -  Colonial mine working
- Diamond Drill Holes
-  Previously reported
 -  Planned or in progress

BCMC Claims 5,400 ha

25km to paved highway and access to Ilo port

90 g/t rock sample

90 g/t rock sample
100 g/t rock, 24 g/t soil

Limit of Resource Jan. 2008

30M oz Ag Indicated

61M oz Ag Inferred

52 g/t rock sample

Unexplored Potential ?

July 18, 2008
