

Santa Ana Silver Project

SOUTH ANOMALY

Resource August 2008
82M oz Ag Measured & Indicated
38M oz Ag Inferred

25km to paved highway and access to Ilo port

90 g/t rock sample

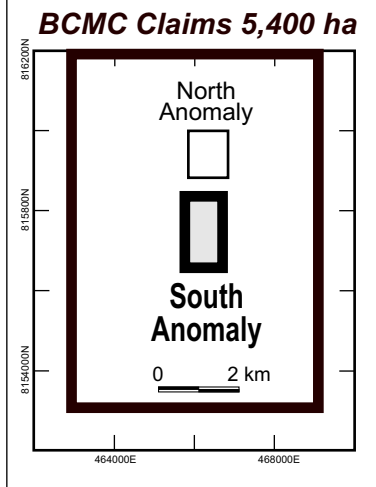

90 g/t rock sample
 100 g/t rock, 24 g/t soil

52 g/t rock sample

Previous Resource

Unexplored Potential ?

-  Post-mineral tuff
-  Andesitic volcanics; structural and crackle breccias w/ iron oxides - barite - Ag on fractures
-  Quartz-feldspar porphyry dike
-  Structural trends
-  IP anomaly
-  Colonial mine working
- Diamond Drill Holes**
 -  Newly reported
 -  Previously reported
 -  Planned or in progress
